

A healthy, green turf... That is the only reason you devote so much time and resources on your irrigation system and landscape maintenance.

If you are not getting the field results you deserve or are wastefully chasing field symptoms that never go away, hop on over and see what your world should be like.

THE GRASS REALLY IS **GREENER**  
ON OUR SIDE OF THE FENCE

## Would You Drive Your Car Without a Dashboard?

- ▶ For over 15 years Hoover has been living in a world that others are still trying to catch up with.
- ▶ Nothing else in the industry comes close to our exclusive Third-Generation Flowguard which now includes fully integrated irrigation controllers making irrigation management as simple as you could wish for.
- ▶ Manage from the source to the nozzle with one system with our time tested – field proven technology that has saved our clients in excess of \$35 million over the last decade.

- ▶ With our fully integrated Flowguard irrigation controllers, every irrigation cycle becomes its own wet check down to the individual zone level.
- ▶ The real-time and historical Flowguard graphs are just the beginning of the indispensable information Flowguard provides so you know what your zones are getting at all times.
- ▶ You need to know what you have in order to manage it.

It's all about a healthy turf and if you can't manage your irrigation you can't survive on our side of the fence.

- ▶ Automated daily reports and GIS Zone Mapping so your provider can go right to the identified concern.
- ▶ Why chase problems and only put out fires when you can manage the entire system so much easier, for so much less money, and no more headaches?

## Plant Health Imagery

- ▶ Irrigation is not about dumping a ton of water on the property and magically things turn green and healthy.
- ▶ Overwatering can result in green turf (at times) while leaving you with a non-sustainable root system.
- ▶ Proper watering leads to a healthy, deep root zone with lower fertilization and pest control costs.
- ▶ Our technology and solutions can show you more than just your eyes alone can.

***Whether your source is city water, a lake, a well, or reclaim, Hoover has the Solution for you.***

**35+ years** of irrigation and pump station design and installation.

Over **8000 pump stations** throughout Florida and the Caribbean.

Maintain over **1000**, remotely monitor over **800**, and service **1000s** of other stations across the state.

We have been the leader in engineering and building the best pump stations in the world for over 35 years. Now we provide a FULL solution package to manage from the source to the nozzle. This brings our Technology to the field to manage your entire irrigation system from a single, fully integrated platform.

Along with our lifetime of support, why would you settle for anything *less* for your costly landscape?

Come live in a world where money really does **grow on trees**.

- ▶ How long will your property be around?
- ▶ Can you really picture trying to manage worsening irrigation conditions as your system ages?
- ▶ Our solutions and support provide a lifetime of savings creating an annuity for your project to spend money on other areas that require attention.

**PROVIDING SOLUTIONS THAT LAST A LIFETIME!**
